Welcome to LT 716!
Fall 2017

LT 716 – Systematic Design of Instruction will guide students through the Instructional Design process using a systematic approach. The focus of this course will be on using the Instructional Design process for educators working in K-12 education. This course will help educators make decisions about instructional methods – learning outcomes, assessment, and technology use – and reflect on these decisions.

The required textbook for this class is Cennamo, K. & Kalk, D., (2005) Real World Instructional Design, Wadsworth, a division of Thomson Learning, Inc. ISBN: 0-534-64267-5. Students will be expected to have the text book for the first day of class.

The first day of class will be Monday, August 21, 2017. Students will be expected to have their book when class starts and also be expected and be able to log into D2L (Desire2Learn) on this date. Unless otherwise stated, I will respond to e-mails within 24 hours on weekdays, or by the end of the day on Monday if you e-mail the instructor during the weekend. Students should use D2L e-mail for contacting the instructor.

Students will need to meet certain requirements for participating in this course. These requirements and other information related to taking on-line course can be found at http://www.usd.edu/continuing-and-distance-education/student-resources.cfm.

If you have any questions about this course, please feel free to contact me.
