Welcome to LT 731 Multimedia Production. My name is Don Versteeg and I will be your instructor for this course. This course will deal with using digital images and video technology to create multimedia. The focus of this course will be for K-12 Educators however the course information and assignments can be customized to any work environment.

LT 731 will be delivered on-line via Desire 2 Learn (D2L). The first day of class is Monday, January 8, 2018. The last day of class is Friday, May 4, 2018. Students will be expected to participate in all course activities and complete all assignments during this time.

This course does require some additional computer/hardware and software requirements. This is to accommodate the successful use of the software that you will be using to create the multimedia assignments. Please be sure that you have a computer with the following:

1. For information about USD’s technical, academic and student support services, as well as how to take advantages of these services please refer to the Division of Continuing Education Student Resources web page found at [http://www.usd.edu/continuing-and-distance-education/student-resources.cfm](http://www.usd.edu/continuing-and-distance-education/student-resources.cfm). This web page also contains links to important information pertaining to minimum technology requirements, registration information, as well as other university services and policies.

2. Digital Camera, Digital Video Camera, and tripod: You will need to have access to these items. It is not necessary that each student purchases this equipment, but it is required that each student has access to this equipment throughout the duration of the course. Also, check to make sure that your computer has the necessary ports to connect the digital camera and digital video camera to your computer (also necessary cables) so you can transfer the images or video to your computer.

3. Students will be required to have a Google account for use with this course. Many of the Google Apps will be used during this course. Students are encouraged to use their USD Google Apps account. Complete details will be available in D2L when the course starts.

TEXT BOOK

There is no required text book for this course.

If you have any questions, please contact me. Thanks!
