Master of Science in Administrative Studies – Online
Health Services Administration Specialization

This cross-disciplinary program provides the primary tools and organizational skills necessary to more effectively perform administrative roles. Course work focuses on the practical application of theory and developing an intellectual framework for analyzing and successfully addressing challenges associated with the administrative environment. This program values past work experience and benefits people from a variety of different backgrounds including health care, government, non-profit agencies, law enforcement, and social services.

The MSAS program is designed for people currently in full-time employment. Therefore, course schedules are created around normal working hours. Further, the program is generally designed to allow students to take six hours of course work per semester (including summer). This enables students to complete the program within a two to three year period.

MSAS Degree Core Requirements

The Master of Science in Administrative Studies program has a central “core” of at least 24 hours in coursework that must be taken by all students. The core requirements are supplemented by 12 hours of coursework in a particular area of emphasis called a “specialization.” Currently, the MSAS program offers specializations in Organizational Leadership, Human Resources, Health Services Administration, Long-Term Care Administration, Criminal Justice (Rapid City only), Alcohol & Drug Studies, and Interdisciplinary Studies.
