

Welcome students to EDAD 712,

This course, School District Administration, is often referred to as the superintendent's course. The purpose of the course is to provide you with the necessary information to become a superintendent of schools.

My name is Robert Mayer and I am in my third year as an assistant professor of educational administration. My prior experience includes twenty two years as a superintendent in small, medium, and large school districts in Nebraska, and South Dakota. Those two decades have given me a wide variety of experiences that I hope will benefit you as you study about school leadership at the highest level.

You are aware that this class is distributed through D2L. I will communicate with you through the discussion portion of the course. I will post the due dates for the assignments during the first week of class and directions for the discussions part of the course.

Looking forward to our time together.

Robert Mayer, Ed.D
