The International Seed Society for Seed Science, the Brazilian Society of Plant Physiology and the organizational entities are pleased to invite all seed science related scientists to attend the “**The ISSS Symposium: Tolerance, resistance and adaptations of seeds for germination under stresses**” to be held in Recife-PE, Brazil, on 12 September 2005 as part of the X Brazilian Plant Physiology Congress and the XII Latin American Plant Physiology Congress.

<http://www.cfv2005.com.br/indexi.php>

Program: (Brum Auditorium: 2 to 4 pm Monday 12 September 2005)

The ISSS Symposium: Tolerance, resistance and adaptations of seeds for germination under stresses.

Coord. Dr. Eliana Akie Simabukuro – UFPE, Recife, Brazil.

- Extreme temperatures and seed germination - Dr. Fabian Borghetti - UnB, Brasília, Brazil.
- Light as stress factor in seed germination - Dr. Massanori Takaki - Unesp, Rio Claro, Brazil.
- Perceptions and advances on stress susceptibility and tolerance during seed development, imbibition and germination - Dr. Renato Delmondez de Castro - UCSal, Salvador, Brazil.
