## **7. Explanation of the Change:**

The proposed addition of KSM 482 to the Kinesiology & Sport Management curriculum will provide students with a more in-depth look at the theory behind Strength and Conditioning, along with more hands-on experience. By providing this class, which focuses on theory and application, we are filling a void within the program. This will make the Exercise Science specialization more complete and satisfy the interests of more students, especially those who are interested in the field of Strength and Conditioning, Sports Performance, and Personal Training.
