

SOUTH DAKOTA BOARD OF REGENTS
ACADEMIC AFFAIRS FORMS
Substantive Program Modification Program

UNIVERSITY:	University of South Dakota
CURRENT PROGRAM TITLE:	Computer Science, M.S.
CIP CODE:	11.0101
UNIVERSITY DEPARTMENT:	Computer Science
UNIVERSITY DIVISION:	Arts & Sciences

University Approval

To the Board of Regents and the Executive Director: I certify that I have read this proposal, that I believe it to be accurate, and that it has been evaluated and approved as provided by university policy.

 Vice President of Academic Affairs or
 President of the University

 Date

1. This modification addresses a change in (place an "X" in the appropriate box):

- | | |
|---|---|
| <input type="checkbox"/> Total credits required within the discipline | <input type="checkbox"/> Total credits of supportive course work |
| <input type="checkbox"/> Total credits of elective course work | <input checked="" type="checkbox"/> Total credits required for program |
| <input type="checkbox"/> Program name | <input type="checkbox"/> Existing specialization |
| <input type="checkbox"/> CIP Code | <input checked="" type="checkbox"/> Other (explain below)
Add accelerated program option. |

2. Effective date of change:

3. Program Degree Level (place an "X" in the appropriate box):

Associate Bachelor's Master's Doctoral

4. Category (place an "X" in the appropriate box):

Certificate Specialization Minor Major

5. If a name change is proposed, the change will occur (place an "X" in the appropriate box):

- On the effective date for all students
- On the effective date for students new to the program (enrolled students will graduate from existing program)

Proposed new name: _____
Reminder: Name changes impact require updating any related articulation agreements, site approvals, etc.

7. Primary Aspects of the Modification (add lines as needed):

Existing Curriculum

Proposed Curriculum (highlight changes)

Computer Science, M.S.

N/A

				<p>Accelerated Master's Program: BS/MS</p> <p>Up to 9 credits applied toward the B.S. program may be used to satisfy graduate credits. The following restrictions apply:</p> <p>a. The courses must be taken at the 500/600 level as an undergraduate. Courses taken at the 500/600-level can be applied to both the B.S. and M.S. degrees. Dual-listed courses must be taken at the 500-level.</p> <p>b. The student must apply to, and be admitted to, the accelerated program prior to taking courses to be credited toward the accelerated program.</p> <p>c. No courses taken prior to admission to the accelerated program may be counted toward an accelerated graduate degree. No exceptions to this policy will be approved.</p> <p>d. Courses that are "double counted" must be approved by the department chair for inclusion in the program of study prior to registration for the course or the credits will not be applied toward the accelerated graduate degree. No exceptions to this policy will be approved.</p> <p>e. Only courses taken at the student's home institution are eligible for dual credit. No transferred courses from other institutions will be allowed to count toward the accelerated master's degree.</p> <p>f. To fulfill the undergraduate required courses, graduate courses on the same topic areas must be taken.</p>
Total number of hours required for degree	31-33		Total number of hours required for degree	30-33

8. Explanation of the Change:

Computer science has been identified as a field with critical workforce needs. In fact, the U.S. Department of Labor has predicted a critical shortage of skilled computer scientists in the next 5-10 years. As workforce demands for highly skilled computer scientists are growing, especially in the areas of Software Development, Data Analysis, Computer Networks and Security, the Accelerated Master's program will enable USD's students to more quickly enter the highly skilled workforce. (See enclosed table.)

The current national IEEE/ACM standard identified the current core knowledge areas that we expect all computer science students should study. The outdated courses are removed from the list of core courses for all graduate students.

Current trends in computer science require the Master Thesis to be done in two semesters with 6cr. Furthermore, the 31cr. requirement forces the Plan A students to take another 3cr. course because most of our courses have 3cr.
