

# Fall 2016 Schedule of Classes

## Undergraduate

### Accounting (ACCT)

**For further information please contact 677-5455**

ACCT 210 & ACCT 211 are prerequisites to all advanced courses (300 level and above) in Accounting. Business students who have not yet been admitted to their majors seeking enrollment in 300 or 400 level ACCT courses must complete a waiver request form and have it on file with the Student Services Center (B101) prior to registration. Waiver forms are available through the Beacom School of Business Student Services Center, Beacom Hall 101. Please check with your advisor if you are a business student planning to enroll in upper-level business classes before admission to your major. Notice of combined examinations - in some courses where there are multiple sections, hour exams may sometimes be given at an hour other than the regular class schedule. When this is done omitting a subsequent class hour may compensate the time, but a decision on this will be determined by conditions at the time.

Business students who have not yet been admitted to their majors seeking enrollment in 300 or 400 level BADM courses must complete a waiver request form and have it on file with the Student Services Center prior to registration. Waiver forms are available through the Beacom School of Business Student Services Center, Beacom Hall 101. Please check with your advisor if you are a business student planning to enroll in upper-level business classes before admission to your major. Notice of combined examinations - in some courses where there are multiple sections, hour exams may sometimes be given at an hour other than the regular class schedule. When this is done omitting a subsequent class hour may compensate the time, but a decision on this will be determined by conditions at the time.

**Economics (ECON)****For further information please contact 677-5455**

ECON 201 & 202 are prerequisites to all advanced courses (300 level and above) in Economics unless otherwise stated. For Economics majors, ECON 301 should be completed as soon as possible and that ECON 421 be taken in the junior year. Notice of combined examinations - in some courses where there are multiple sections, hour exams may sometimes be given at an hour other than the regular class schedule. When this is done omitting a subsequent class hour may compensate the time, but a decision on this will be determined by conditions at the time.

Broad overview of bioinformatics and systems biology with a focus on introducing large-scale biological data analysis. Students will learn standard tools and techniques used to analyze and interpret biological data. Students will also learn about the concepts and applications of systems biology. The computer software and skills of data analysis introduced will be useful for biological data generated from studies of genomics, microbiology, ecology, physiology, and neurobiology. No background in computer science will be expected. However, knowledge of basic computer science including computer operation experience, basic concept of programming language will be useful. The course will contain lectures, literature reading and discussion, projects, and a lab component to learn bioinformatics and statistical analysis tools.
