Budget Considerations

The total budget may not exceed \$2,000. The budget period may run up to 12 months from the beginning of the project, with April 1st as the earliest start date. Typical project costs can be budgeted, with the exception of meeting/conference/training travel. Travel directly associated with conducting the project is allowable (e.g. conducting assessment or experiments at another facility or field work).

Budget Justification (one page limit):

Itemize how you propose to spend the award (up to \$2,000). Justify the need for each major item. Also explain what other funding is available to support this project (and if none, state so).
